

AI COMPUTE ECOSYSTEM PARTNER

AI Compute, One Accountable Line

The connective layer between you and a running GPU cluster. We sit on your side of the table, source the hardware, and connect every layer in between.

SSP is the single accountable line through the entire AI-compute chain.

Buying GPUs today means a maze of suppliers, importers, data centers, networks and compliance. **You want models trained, costs cut and capital preserved. You do not want twelve vendor relationships.**

SSP replaces that chain with one relationship. We represent the **buyer, not the operator**: we hold no stock and set no prices. The largest NVIDIA suppliers contract us to bring them qualified, compliance-ready customers, so our advocacy sits entirely on your side and the price you get is the direct price.

TWO WAYS TO GET COMPUTE · 01

Own it: buy and deploy your own hardware

When you need the asset on your own balance sheet or in your own facility, SSP delivers **end-to-end**: a raw need becomes reserved, delivered, compliant, running hardware in **named Tier III facilities**.

Compliance first is the moat: it earns real allocation from tier-1 suppliers and keeps **sovereignty and data residency** intact for regulated buyers. Around the hardware sits the **whole stack through one relationship**: direct distributor pricing, and an Importer-of-Record partner that clears customs, recovers VAT and lands your gear insured to 200+ destinations.

The buyer's headaches, and our answer

Procuring at scale usually means:

- + Suppliers who move nothing without full KYC and export compliance
- + 12 to 16 week lead times, capex tied up in depreciating assets
- + Customs, VAT and freight risk spread across strangers
- + No single party accountable when something slips

SSP closes the gap. Our compliance discipline earns allocation others cannot get. We scope the deal properly, hand the supplier a customer ready to transact, and stay accountable from shelf to running cluster.

Compliance first

End-to-end delivery

Whole stack, one relationship

Sovereignty & data residency

Named Tier III facilities

Live NVIDIA inventory · A100 to GB300

Global presence

HOW IT WORKS

One loop, from raw need to running cluster, and we stay on the line the whole way.

1 • Qualify

We find the real buyer and scope the deal. You get a properly specified requirement, not a guess.

2 • Access

Our compliance record earns allocation a cold broker never gets. You get hardware that actually exists.

3 • Deliver

Importer of Record clears customs, recovers VAT and ships insured, white-glove. You get a landed, running deployment.

We qualify and connect · the supplier supplies · the logistics partner lands it. **SSP stays accountable across all three.**

Risk: performance-based fee

Why the price is the direct price

We are paid by the supply side, only when you end up better off. Performance-based, on their side of the ledger. Your number is direct distributor terms, and our compensation never rides on top of it.

What that buys you

- + Zero risk: we are paid on performance, not retainer
- + Named Tier III facilities and real allocation windows
- + A deposit that secures *your* specific hardware

Lease it: live in weeks, off your balance sheet

Reserved bare-metal in a **Tier III certified AI data center**: compute ranging from A100s to GB300 NVL72 Grace Blackwell, multi-year terms, no capex, no depreciation risk. 100% financeable and off balance sheet.

- + **4 to 8 weeks deployment**, not 12 to 16 week procurement lead times
- + **20% deposit** secures your allocation window
- + Escape the cloud bill: dedicated hardware, not a shared meter
- + Scale from a single node to clusters of thousands

The leasing lifecycle

OUR MISSION

Remove the layers between a buyer and running compute.

Other brokers *add* a layer of cost and a layer of risk. SSP removes layers. We are the single line that replaces the whole chain of intermediaries, and the only one whose compliance discipline earns real allocation from tier-1 suppliers.

Reserved bare-metal NVIDIA

Direct pricing

Importer of Record

100% financeable

Multi-tenant cloud

The connected stack

Every product layer around the compute, from one accountable desk.

Compute

Reserved bare-metal NVIDIA, single node to clusters of thousands.

Export & logistics

Importer of Record: customs, VAT recovery, insured global freight.

Data center & power

Space, power, cooling. Purpose-built rapid AI facilities.

Networking

Switching, optics, cabling. Private low-latency links between sites and clouds.

Cloud & orchestration

Turn raw GPUs into a secure, multi-tenant, monetizable AI cloud.

IT services & ITAD

Managed IT and Copilot enablement, plus secure decommission, data destruction and buyback.

VALUE ACROSS YOUR TABLE

One partner, answering to every seat.

For finance & leadership

- + Direct distributor pricing, no broker markup on your number
- + 100% financeable, off balance sheet, no capex or depreciation risk
- + Performance-based fee, 0% risk on your side of the deal

For technical & infrastructure teams

- + Named Tier III facilities and real allocation windows, not vaporware
- + Deposit secures your specific hardware, live in weeks not months
- + The full stack connected: network, cloud, deploy, decommission

WHO WE WORK WITH

Built for buyers who need real allocation and cannot afford a broker who over-promises.

Neoclouds & GPU resellers

Big node counts, resell or partition, take-or-pay.

AI training & inference

H200 / B300 nodes, financing, an escape from the cloud bill.

Enterprise AI & HPC

Modest compute plus the whole stack: Copilot, Azure, network.

Sovereign & government AI

Data residency, named facilities, compliance-first.

Trusted where it counts. Contracted by the largest NVIDIA suppliers, working with Importer-of-Record and Tier III data center partners to land compliant compute worldwide.

Tier-1 NVIDIA suppliers

Importer-of-Record partner

Tier III certified facilities

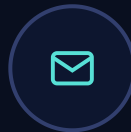

Tell us what you need. We put one accountable line through the rest.

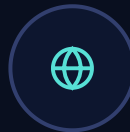

Reserve or want-to-buy requests acknowledged in 1 hour, first sourcing pass within 1 business day.

Direct connections. Strategic advantage. Real results.
